Should I resell or recycle used solar panels?
The first step in your assessment to determine whether to resell or recycle used solar panels is to conduct a hardware audit. This step should ideally take place before decommissioning; however,you can still complete a thorough audit after the fact as well. While the PV system is still connected,inspect and test the modules.

Are solar panels worth resale?
However,disposing solar panels in landfills is throwing away something of value. If the panels are still functioning,then there's likely a resale value. If they're truly at end-of-life,then valuable materials,such as silicon,copper,aluminum,silver,and glass can be extracted during the recycling process and reused.

How much does it cost to recycle solar panels?
According to Sam Vanderhoof,CEO of Recycle PV Solar,only 10% of decommissioned solar panels in the United States are recycled; the rest flow to landfills or are allocated for reuse. The primary reason for this is the cost to recycle,which varies from $15 to $45 per panel. Whereas landfills typically charge $1 to $2 per panel.

How do I resale solar equipment?
For resale,you'll need to decide whether you want to handle the sale in-house or contract with a solar equipment broker. Either way,online exchanges,like EnergyBin,make it easy to connect to reputable resellers and wholesale buyers.
