What is a 200 amp service upgrade?

200 amp service upgrade is a process of increasing the capacity of your home's electrical distribution system. Upgrading electrical service involves installing a new 200 amp distribution panel, meter socket, and electrical wiring.

Can a 200 amp panel handle a 100 amp load?

A 200 amp panel will handle a 100-amp service load. Moreover, it can accommodate additional branch circuits. Modern homes require a 200 amp service as a minimum to support electrical heating or cooling equipment. Should I upgrade to a 200 amp panel? Home upgrades require some power to spare.

How do I know if my meter box has 200 amps?

Your meter box should have a rating on the front. If you have CL200 listed on the front, you have 200 amps coming into your home from the power company. Now, this doesn't necessarily mean you have 200 amps. You may have less, depending on your electrical panel size. Next, check the main breaker amp rating.

Do you need a 200 amp panel box?

Today, old panel boxes are unguaranteed to support the massive power needs of new generation equipment. Having the desire to move to a new home or add a class of appliances calls for the best 200 amp panel. This upgrade will extend your electrical span and make your home safer from overload and other power-related accidents.
