-----

Main Features : 1) With balance 2) With Balance/Signal Cables; 3) With Temperature switch 4) The BMS charge with discharge port is the same; 5) Detection circuit (over-discharge, over-current, and load ...

20S /24S LiFePO4/lithium-ion battery PCM for 60V, 72V or 84V electric motorcycle. For the details of the battery management system (BMS), please view the pictures of the specification on the website.

We carry 3s-20s and both Lithium Ion (Li-Ion) and Lithium Iron Phosphate (Lifepo4). The lithium ion version also works with Lithium Polymer (Li-Po) since they both have the same parameters.

This type of BMS is most widely used with the feature of reliable and good cost performance. Resistor bleeding cells balancing is the most widely used cells balance technique

DALY SMART Lifepo4 20S 60V 100A Common Port Bluetooth Battery protection Module (default to lifepo4 cells) with 21 wires sense cable with connector, thermostat and Bluetooth dongle. This bms is ...

JBD-SP04S060 smart BMS is a software protection board scheme specially designed for 4 strings of lithium battery packs. This smart bms supports a continuous current of up to 300A.

Q. What type of charger should I choose? Q. The relationship between Battery capacity and BMS current? Q. Whether my BMS damaged? Q. Are the CANbus ports on these BMS'es &quot;electrically ...

Wide Application: This versatile BMS works with Li-ion, LiFePO4, and LTO batteries. Suitable for Electric Sightseeing Car, Micro EV, and Electric Cargo Tricycle and so on, it offers ...

Q. What type of charger should I choose? Q. The relationship between Battery ...

Description JK BMS JIKONG Active Balance Smart BMS Number of Battery Strings:7S to 20S. Continuous Current:150A. Power supply mode:The battery pack is self-powered. Single cell voltage ...

## 20s bms lifepo4

Over charge and over discharge protection: The LiFePo4 battery pack will stop charge after the single cell voltage reaches 3.7V and stop discharge when its voltage reaches 2.5V. Temperature ...
