How does a solar inverter work?

An inverter used in a solar-first, mains complementary system works on a priority-based principle, where solar energy is given precedence over the mains power supply. The inverter intelligently manages power sources to maximize the use of solar energy while seamlessly switching to mains power when solar production is insufficient.

For off-grid solar systems, off-grid inverters don't have to match phase with the utility sine wave as opposed to grid-tie inverters. Electrical current flows from the solar panels through the solar ...
