What is the first mass-production passenger vehicle equipped with sodium-ion batteries?

Mumbai, Feb. 19 -- Changan Automobile and CATL have unveiled the first mass-production passenger vehicle equipped with sodium-ion batteries.

How big is the sodium-ion battery market?

The global sodium-ion battery market is forecast to grow from USD 1.39 billion in 2025 to USD 6.83 billion by 2034. To support adoption, CATL plans to establish over 3,000 Choco-Swap battery swap stations across 140 cities in China by the end of 2026, with a focus on northern regions. The launch follows a decade of research.

How much did CATL invest in sodium ion technology?

The launch follows a decade of research. Since 2016, CATL has invested nearly 10 billion RMB (USD 1.45 billion) into sodium-ion technology, developing approximately 300,000 test cells. The project was supported by a dedicated team of 300 personnel to ensure scalability and performance.

In 2018, we initiated mass production of the battery cabinet casings. This transition to large-scale manufacturing marked a significant milestone, showcasing our ability to deliver top-tier products on a ...

Yakeshi, Inner Mongolia | 5 February 2026 - CHANGAN Automobile, in partnership with CATL, today unveiled the world's first mass-production passenger vehicle equipped with sodium-ion ...

512-channel lithium battery grading cabinet with 1% precision and 15,000pcs/day output. German tech, Chinese pricing. Click for energy-saving solutions.

Mumbai, Feb. 19 -- Changan Automobile and CATL have unveiled the first mass-production passenger vehicle equipped with sodium-ion batteries. The vehicle, showcased at the "Changan SDA ...

This advanced energy storage battery cabinet is not only dedicated to solving the challenges of energy storage and management, but also takes an important step on the road of ...

As global demand for energy storage surges by 23% annually (BloombergNEF 2023), the battery cabinet

Battery cabinet mass production

manufacturing process faces unprecedented challenges. Did you know that 40% of ...

Sodium-Ion Battery Production Scales Up Worldwide Unigrid, Emerald Battery Labs, and CATL are pushing Na-ion batteries as a less expensive, safer, and commercially viable option to ...

Summary: This article explores advancements in energy storage container battery cabinet production, focusing on applications in renewable energy integration, industrial backup systems, and grid ...

Hongda New Energy provides comprehensive, customized solutions and "full-cycle service" for all battery types, including two-wheel electric vehicle batteries, large-scale energy ...
