One energy storage technology in particular, the battery energy storage system (BESS), is studied in greater detail together with the various components required for grid-scale operation.

We construct, own and operate large-scale battery storage projects today that will transition us to the grid of tomorrow, with a growing portfolio of over 9,000 MW of battery storage projects in various ...

In this article: STECF Scatec ASA Oslo/Cairo, 05 May 2025: Scatec ASA has commenced construction of its 1.1 GW Obelisk solar and 100 MW/200 MWh battery storage project ...

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling increased penetration of ...

Earlier this year, state-owned utility Egyptian Electricity Holding Co. held an expressions-of-interest tender for the design, construction and operation of a 8.2 MW solar plant and 2 MW/4MWh battery ...

Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer from a major oversupply of electricity, the country is in need of ...

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling increased ...

Well, Cairo's new large-scale battery energy storage project isn't just talk - it's the real deal. With construction kicking off last month near the Benban Solar Park, this 1.1GW behemoth could store ...

With a deadline approaching in Q4 2024, this project aims to deploy 500 MW of grid-scale battery storage, complementing the nation's \$40 billion renewable energy expansion plan.
