Are EV charging stations available in Chad?

The electric vehicle (EV) charging infrastructure in Chad is still developing, which can make everyday use a bit tricky. Public charging stations are scarce, and their availability is uneven, particularly in rural areas.

What EV models are available in Chad?

Although charging infrastructure is still developing, urban areas like N'Djamena are seeing increased interest, supported by government policies and potential tax incentives. Key EV models available in Chad include Tesla Model Y, Hyundai Ioniq 5, and Chevrolet Equinox EV, with prices ranging from \$32,875 to \$46,630.

Are electric cars a viable choice in Chad?

Electric cars are becoming a practical choice in Chad, driven by lower operating costs and reduced emissions. Although charging infrastructure is still developing, urban areas like N'Djamena are seeing increased interest, supported by government policies and potential tax incentives.

Are EVs the future of road transport?

Two/three-wheelers - an important mode of road transport in the region - electrify faster: by 2030, almost 1 in 3 such vehicles sold are electric. Across all vehicle modes, the deployment of EVs replaces the use of more than 5 million barrels of oil per day globally in 2030, an important energy security consideration.
