What is the Europe data center rack market?

The Europe Data Center Rack Market is Segmented by Rack Size (Quarter Rack, Half Rack, and Full Rack), End-User Industry (BFSI, IT, Telecom, Government, Media, and Entertainment), and Country. The Market Sizes and Forecasts are Provided in Terms of Volume (units) for all the Above Segments. Want to share this?

How much does a data centre cost in Europe?

Construction costs for a data centre increased by 6.5%, reaching an average of \$9.1m per MW (EUR8.4m) across Europe. Zurich is still the most expensive market in Europe.

How much does it cost to build a data centre?

Zurich remained Europe's most expensive market for new data centre development, followed by London and Frankfurt, positioning it as the second-costliest globally, following Tokyo. Across European jurisdictions, building costs range between €7m and €13m per MW of commissioned IT load.

Why is data centre capacity so attractive in Europe?

Data centre capacity in those regions is attractive due in large part to the lower cost of power. Nominal take-up (2MW) was recorded in Europe's second-largest market in Q3. Much of Frankfurt's forecasted take-up will likely be realised in Q4. Germany's financial capital is expected to represent nearly a quarter of European take-up by year end.

The European data center rack market is booming, projected to reach EUR[Estimated Market Size in 2033] by 2033, driven by cloud computing, big data, and 5G. Discover key trends, leading ...

The Europe data center rack market represents a critical infrastructure component driving the region's digital transformation and cloud computing expansion.

Regional data centre providers can offer neocloud providers, such as CoreWeave, with resource-intensive computer equipment, lower power costs, and available capacity, which is ...

This results in an annual cost of approximately €18,200 for a standard 7kW rack. Energy Consumption: The cooling systems play a significant role in total costs, with energy consumption ...

Cost of rack-mounted data center systems in Europe

Across European jurisdictions, building costs range between €7m and €13m per MW of commissioned IT load. This includes land, the building shell, electrical systems, HVAC, mechanical ...

The data center rack market in Europe is expected to reach a projected revenue of US\$ 1,841.4 million by 2030. A compound annual growth rate of 7.9% is expected of Europe data center rack market ...

The Europe Data Center Rack Market value of USD 2.6 million in previous year and it is further projected to grow and register a CAGR of 8.8%. Under Construction IT Load Capacity: The ...

Europe Data Center Rack Market is projected to grow around USD 7.6 billion by 2031, at a CAGR of 12.3% during the forecast period.

The Europe Data Center Rack Market worth USD 0.89 billion in 2026 is growing at a CAGR of 12.87% to reach USD 1.63 billion by 2031. Rittal GMBH & Co.KG, Schneider Electric SE, ...
