Can Denmark deliver to a green transition in energy storage & conversion?

But if Denmark really shall deliver to the green transition within energy storage and conversion, in times characterized by extreme pace and changeability, we must stand together and walk together. DaCES ensures the necessary cohesion that makes it happen. Lars Ottosen, Head of Department and Professor, AU Biological and Chemical Engineering

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

What is the Danish CCS strategy?

Read the political agreements, laws and executive orders. The Danish Energy Agency is working with the Ministry of Climate, Energy and Utilities to implement the Danish CCS strategy, which includes the development of a new regulatory framework to remove market barriers and make CCS possible in Denmark.
