Grid-Connected PV Systems Off-Grid (Stand-Alone) PV Systems Solar Panels Solar Arrays Construction and Mounting PV Combiner Boxes PV Inverters PV Disconnects An inverter is a device that receives DC power and converts it to AC power. PV inverters serve three basic functions: they convert DC power from the PV panels to AC power, they ensure that the AC frequency produced remains at 60 cycles per second, and they minimize voltage fluctuations. The most common PV inverters are micro-inverters, string inver...
