For the latest updates and more information, visit our website: <https://www.foires-salons.eu>

Our main products are the Environmental Test Chamber, Electronic Dry Cabinet, Accelerated Weathering Test Chamber, and all kinds of Drying Ovens. Climatest Symor® is "Made in China".

Shanghai Elecnova Energy Storage Co., Ltd. is a technology-based enterprise who focus on overall solutions for energy storage systems. Our company have the overall supporting capability for the ...

Ever wondered how energy storage cabinets maintain reliability after 10+ years of service? The secret lies in energy storage cabinet aging test equipment - the unsung hero that simulates decades of ...

Our Battery Aging Cabinet is essential for accurately testing and assessing battery performance. Designed with reliability in mind, these cabinets hold CE Certification, guaranteeing compliance with ...

By simulating steam aging environments encountered during transportation, storage, and usage, this chamber ensures compliance with IEC 60068 standards.

It is mainly used for life aging testing and quality control of battery modules in production or experiments. The system is designed with modular design, single point independence of channels, support for ...

We offer a comprehensive testing solution for energy storage systems. Fully intuitive and flexible loading, unloading, characterization and aging tests.

The aging cabinet is mainly used for testing the charging and discharging cycle of finished lithium batteries. The testing items include: battery charging protection voltage, discharging protection ...

This cabinet simulates long-term use conditions by performing charge and discharge cycles to assess capacity fade, efficiency degradation, and thermal stability over time.

Energy storage cabinet aging test equipment

Shanghai Elecnova Energy Storage Co., Ltd. is a technology-based enterprise who focus on overall solutions for energy storage systems. Our company have the overall supporting ...

Aging room, also known as high-temperature aging room, boiler room, and burner room, is a device designed for testing high-performance electronic products (such as computer machines, displays, ...
