GIGA Storage has officially launched its third large-scale energy storage project. The battery, called Giraffe, is located in Amsterdam's Western Port Area and, with a capacity of 10 ...

A virtual replica, or "digital twin" of the area, is created for testing optimal energy solutions using data and AI. This optimises energy efficiency, stabilises the local grid, and stores excess ...

The energy assets at Schoonschip are being aggregated together with large-scale storage and production systems into a Virtual Power Plant which will help balance the European electricity ...

The system combines several compatible technologies, including rooftop solar panels, electric vehicles, heat pumps and storage batteries, to intelligently harvest and distribute clean ...

In this district, new energy efficient buildings are being built, a high share of RES generating solutions is installed and smart technology is deployed for optimising local energy balance and sharing between ...

Located in the Westhaven of Amsterdam, the new battery installation--named Giraffe--is the largest in the city, with a power capacity of 10 MW and an energy storage capacity of 47 MWh. ...

Development and implementation of an Energy Storage System with different applications in a stadium that uses "second life" batteries of Nissan Leaf cars, that generates ...

Named Giraffe, the new battery installation is the largest in the city with a power capacity of 10 MW and an energy storage capacity of 47 MWh. Sustainably generated energy can be ...

A shared energy storage optimization allocation method considering photovoltaic (PV) consumption and light or power abandonment cost is proposed, aiming at the phenomenon of high PV light or power ...
