European Energy has announced the successful securing of EUR37.9 million in long-term project financing from Luminor Bank to develop a hybrid solar and battery energy storage project in ...

European Energy has secured EUR 37.9 million of long-term project financing for a hybrid solar and battery storage project in Saldus, Latvia. Once operational, it will be among the most ...

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

On 17 December, Hyperion Renewables launched construction of its first battery energy storage projects in Portugal, in Estremoz and "vora. The 16 MW / 64 MWh solar-plus-storage projects will support ...

Image: Solar Media--AI-generated image. European Union (EU) countries have made limited progress in implementing recommendations on energy storage deployment and electricity ...

The EU is expected to reach gigawatt-scale hydrogen storage capacity by 2030, driven by green hydrogen projects in Germany, the Netherlands, and Spain, where it can be used both as a fuel and ...

The two parties will conduct in-depth collaboration in project development, technology implementation and long-term operation in line with local demand in the European energy storage ...

The project marks the first large-scale battery storage system integrated into a solar power plant in North Macedonia and one of the most significant hybrid renewable projects in the Western ...

Our Mission Solar 2040 study estimates that 1.2TWh of storage will be required to meet solar energy targets and save the system EUR160 billion EUR by 2040. However, we need an EU ...

The goal is to list all planned and operational energy storage projects in Europe by location and technology.

Eu energy storage solar project

The dashboard can be filtered by country, project status and technology.
