Does the Belt & Road Initiative affect electrification levels?

Learn more. Electrification is crucial for achieving global net zero emissions and reducing energy poverty, particularly in developing countries involved in the Belt and Road Initiative (BRI). This study uses the difference-in-differences method to examine the BRI's impact on electrification levels in 118 countries from 2009 to 2020.

What is the Belt & Road Initiative (BRI)?

The Belt and Road Initiative (BRI), a transformative endeavor spearheaded by China to foster infrastructural, economic, and cultural linkages across continents, has entered its second decade with an evolving agenda that embraces both challenges and opportunities.

Why is the Belt & Road Initiative important?

“Looking ahead, the BRI will make greater contribution to building a global community of shared future and establishing a more just and reasonable international order,” the director noted. This year is deemed pivotal for high-quality development of China-proposed Belt and Road Initiative (BRI), which has just celebrated its 11th anniversary.

Why did China propose the Belt & Road Initiative?

Problems and challenges continue to threaten the progress of human civilization. In response to a changing global situation and the expectations of the international community, and with the future and overall interests of humanity in mind, China proposed the Belt and Road Initiative (BRI).

The Belt and Road Initiative is a creative development that takes on and carries forward the spirit of the ancient silk routes -- two of the great achievements in human history and civilization.
