In Orlando, Florida, industry leaders, technology innovators, and policymakers will convene to discuss the real-world applications, challenges, and breakthroughs that will define the next era of energy.

In Florida, both Florida Power & Light (FPL) and Tampa Electric are partnering on microgrid projects. FPL, which describes itself as the largest energy company in the US as measured by retail electricity ...

Each home will have an 8 kW solar array integrated into a roof membrane, and every two homes will connect via a 43 kWh battery, forming a microgrid named the "BlockLoop" by Block Energy.

Several home or neighborhood microgrids are in some stage of planning and may or may not come to be. But the Southshore Bay project is up and running -- and has been for several ...

This innovative energy storage project comprises a 5-MW solar array and a 7.5-MW by 15-MWh stationary battery, as well as two mobile EV fast charging trailers. The project enables FPL to test the ...

In Florida, a 37-home subdivision with a community solar microgrid was able to maintain access to power despite outages elsewhere in the area. An energy expert has explained just how ...

None of the microgrid equipment was damaged by the hurricane. The system provided 100% uptime to customers, even when the grid-tie went down for three days.

When Hurricane Ian hit Florida, Georgia, Virginia and the Carolinas in 2022, more than two million people lost power. But microgrids kept critical services running at hospitals, universities,...

In addition, the system provides the entire community with on-site backup power, meaning that it is less likely to experience blackouts during heavy storms -- no small concern in Florida, ...

The site already has all of the required resources in place, allowing NextNRG's patented energy technologies

Florida microgrids berne

like solar integration, predictive analytics, and hybrid microgrids to be deployed.
