A flywheel serves four main purposes (in most vehicles): It provides mass for rotational inertia to keep the engine in motion It is specifically weighted to provide balance for the crankshaft It ...

Saw a video last night of someone "referencing " another video about someone removing a flywheel the toolless way, hammering it off with a hammer and punch. Said it somehow reversed ...

This previous question explains what a flywheel does and why it is needed. That explanation means that the flywheel needs a certain amount of mass to do its job. However, an ...

The darn thing has no spark. I figured a bad coil, but much to my surprise, if I swapped a different flywheel in, the saw had spark. The flywheel has a broken fin that did some damage to the ...

I have a stihl 064 I think the coil is going out. I pulled the flywheel today and its a 1122 400 1204 the coil is the prufrex 1122 400 1303. I know this was talked about a few months ago but ...
