How many mounting threads are there on a Freedom won module?

There are three fixing threads on each side of the module near the front, as indicated, that match the 19" rack mount brackets available from Freedom Won on request. The primary installation arrangement is intended to be stacking the modules into a tower using the inter-module pedestal, but for applications requiring 19"...

Which busbar accessories are compatible with the Freedom won eTower?

*Note that the Freedom Won busbar accessories are designed for the pedestal tower dimensions, not for 19" rack mounting, which has different spacing. CAN Bus (RJ45 Socket x 1) - for interfacing with compatible inverters and system controllers (the eTower is fully compatible with all common CAN bus compatible brands).

What are the specifications for the Freedom won eTower modular stackable LiFePO4 battery?
