What is a gravity exhaust shutter?

Gravity exhaust shutters are used to keep air flow from blowing back into your exhaust fan when the unit is turned off. This helps with unwanted outside air entering your space. Another use is a passive solution to allow air out of your space when using a supply fan.

What is a motorized exhaust shutter?

They can be installed directly on a building wall, and are also able to be directly mounted onto some fan housings. Motorized exhaust shutters are used to keep air flow from blowing back into your exhaust fan when the unit is turned off. They utilize a small electric motor to open and close the shutter.

What are shutter vents made of?

Made of mesh, they let air flow through, so the pressure in your enclosure stays constant as temperatures fluctuate. Choose from our selection of shutter vents, including movable-blade wall louvers, heavy duty movable-blade wall louvers, and more. In stock and ready to ship.

What is a gravity intake shutter?

Gravity intake shutters are typically used on the opposite wall that an exhaust fan is placed, to allow for fresh air to enter your space while the exhaust fan is running. This prevents a negative pressure situation that can prematurely burn out your fan motor.

Generator exhaust extension kits reduce noise and safely vent fumes. Universal adapters, silencers, and mounting plates for portable generators.
