Energy Northwest plans a first-of-a-kind solar power generating and storage facility just north of Richland, thanks to the recent award of a Washington State Clean Energy Fund grant.

Our team leverages an in-depth understanding of state energy policy, existing energy infrastructure, solar energy industry trends, and land development experience combined with local ...

While we don't see the same results in kilowatts hours (kWh) as residents in Arizona or California, the benefits are still substantial. If you are considering making the switch to solar power ...

Browse reports and documents relevant to the Council's work on fish and wildlife and energy planning, as well as administrative reports. This is a subset of the Power Generation Map to more clearly show ...

Funded in part by a \$3 million grant from the Washington State Clean Energy Fund, Energy Northwest has powered up its Horn Rapids Solar, Storage & Training Project in Richland. ...

As a Washington state joint operating agency, Energy Northwest comprises 28 public power member utilities from across the state serving more than 1.5 million ratepayers.

Coupled with the glacial pace at which new renewable energy is added to the electrical grid, the study finds the greater Northwest is not prepared for the rising power demand.

Explore Energy Northwest's energy projects delivering clean, reliable, and carbon-free power across the Pacific Northwest. Learn about nuclear, solar, wind, and hydroelectric solutions driving a sustainable ...

Over the next six years, Energy Northwest and BPA will collaborate on planning and implementation. Once completed, the additional 162 megawatts of firm capacity could power approximately 125,000 ...

Great Northwest Solar Power Generation Project

Valmont has provided its solar trackers for 10 projects since 2019 that generate more than 60 megawatts direct current (MWDC) of power, conserving resources and improving lives of more ...
