The county was listed by the National Energy Administration in late 2017 as a pilot location for the establishment of a floating PV power generation ...

By year-end 2025, China's total installed solar capacity reached approximately 1,200 to 1,300 gigawatts, making it the first country to surpass the 1,000 gigawatt milestone. The China ...

In a groundbreaking shift from coal to clean energy, China has launched the world's largest floating solar farm atop a flooded former coal mine in Huainan, Anhui Province.

The project is being developed in phases. When fully completed, the floating solar farm is expected to produce 1.78 billion kilowatt-hours of electricity ...

Floating solar panels on a lake or reservoir might sound like an accident waiting to happen, but recent studies have shown the technology generates more electricity compared ...

On December 27, 2023, China's largest single-unit floating PV power project connected to the grid in Fuyang, Anhui Province. Built by CTG, the project boasts a total installed capacity of ...

Developed by subsidiary Guohua Energy Investment Co, the park is 8 km (5 miles) off the coast of the city of Dongying in Shandong province and ...

China's state-owned CHN Energy has begun power generation at a 1 gigawatt ...

The project combines solar power generation and aquaculture, and it will have a total installed capacity of 276 megawatts, covering an area of 8,500 mu (567 hectares). The station will go...

The floating solar power plant is situated around 8km off the coast of Dongying City, on the eastern coast of China, adjacent to the Bohai Sea.
