-----  
What is the future of Bess in Latin America?

To provide a view of what is to come, AMI breaks down the status and opportunities of BESS in main Latin American markets. Chile passed an energy storage and electromobility bill in late 2022, making stand-alone storage projects profitable for operators.

What are the opportunities for battery energy storage systems in Latin America?

The opportunities for battery energy storage systems are growing rapidly in Latin America. Below are some key details for those who want to understand and succeed in the BESS market. In 2010, the IEA projected that the world would reach its 2019 solar penetration only in 2035. Analysts underestimated solar adoption by 16 years.

Does Colombia have a power purchase agreement for hybrid solar & Bess projects?

As of now, Colombia's reliability charge (Cargo por Confiabilidad) has encouraged hybrid solar +BESS projects to progress. Large energy companies have expressed that there are no Power Purchasing Agreements (PPAs) available specifically for stand-alone storage projects, making it harder to finance those projects.

Does Peru have a Bess regulation?

Peru has no existing BESS regulation and is currently evaluating how to move forward with battery storage projects. In fact, in January 2024, Peru's energy and mining investment regulator, Osinergmin, opened a request for a proposal for a study on energy storage.

El almacenamiento energético en Guatemala ya no es una opción tecnológica. Es una variable estratégica que está redefiniendo cómo se estructuran los proyectos de inversión en el país.

For IPPs and utilities, Qstor(TM) BESS is a powerful asset for enhancing grid services and unlocking new revenue streams. Our solution encompasses not just the core technology, but our ...

Mexico's front-of-the-meter BESS market is practically nonexistent. BESS is not defined by law but rather by the market. Storage projects are forced to register as an active power plant ...

Key findings reveal that Lithium Iron Phosphate (LFP) batteries exhibit superior environmental performance across multiple impact categories, with manufacturing contributing 60-80 ...

Each BESS plant shall be available for dispatch by the DSO for flexibility services for 98% of the time, calculated every operational year (equivalent to 358 calendar days).

Located in Guatemala's second-largest city, the Quetzaltenango Energy Storage Plant addresses two pressing regional needs: The plant utilizes lithium-ion battery arrays with adaptive thermal ...

The government has unveiled its Electricity Transmission System Expansion Plan 2026-2050, which for the first time includes battery energy storage systems (BESS) as a grid ...

Battery Energy Storage Systems (BESS) are increasingly recognized as a solution to storage challenges while providing ancillary services. BESS facilitate the in

Guatemala City is witnessing a surge in demand for Battery Energy Storage Systems (BESS) as industries and households seek stable power solutions. This article explores how BESS ...

IPS Guatemala has a generating capacity of 460 MW through our assets across Puerto Quetzal and Esquintla. Discover the plants and barges that power the people of Guatemala every day.
