How long is a solar panel warranty?

Solar panel warranties vary depending on the manufacturer, but in the solar industry, a 10-year product warranty and a 25-year performance warranty are typically considered the minimum standard. However, some manufacturers provide a 25-year product warranty and extend the performance warranty to 30 years. How Much Does a Solar Panel Warranty Cost?

What makes a good solar panel performance warranty?

An ideal solar panel performance warranty should include the following conditions: Certain solar manufacturers may even guarantee a degradation rate as low as 0.25% per year, coupled with a performance warranty period of up to 30 years.

How long do solar panels last?

High-quality panels experience approximately 2% to 3% productivity loss in the first year, followed by less than 0.50% degradation annually thereafter. Consequently, top-tier solar panels can maintain at least 85% of their initial electricity output over 25 years. An ideal solar panel performance warranty should include the following conditions:

Why do solar panels have warranties?

Warranties serve as a testament to the quality of a product. Companies typically offer superior warranties for products of higher quality. While solar panel failures are exceedingly rare due to their design to endure for decades and withstand harsh weather conditions, occasional errors may still occur.

The product warranty focuses on the physical components of the solar panels, such as glass, frames, and junction boxes. This warranty is typically shorter than the performance warranty, ranging from 10 ...
