What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour(kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. Net cost of the system /lifetime output = cost per kilowatt hour

How much does a solar panel cost?

Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components.
