How to install solar street lights?

Select a spot that receives at least 6-8 hours of direct sunlight so that after successful installation, solar panels have enough time to charge the batteries. Next, dig a hole, fill it with concrete, insert a stake, secure it, and adjust the solar panel angle to get maximum sunlight. [How to install all-in-one solar street lights?](#)

How do you charge a solar Streetlight?

Some solar streetlight models require an initial battery charge before the light will operate. Refer to the manufacturer's instructions for charging procedures. It may involve connecting the battery to an external charger. Locate the light switch and turn it on. Observe the light operation for a few minutes.

How do I choose a solar Streetlight?
