Poised to be the world's first fully clean energy-powered tourist destination, the Red Sea Project's microgrid developed by Huawei can cover a development of 28000 sq km to power an airport, 50 ...

Featuring an impressive 400MW solar PV system coupled with a 1.3GWh energy storage system, it is a testament to innovation and environmental stewardship. Watch our video to witness the birth of this zero-carbon city and be inspired by the future of urban development.

Saudi Arabia's Red Sea Project is making waves with the world's largest photovoltaic-energy storage microgrid. It's not just big - it's colossal! At the heart of this green marvel is Huawei's FusionSolar ...

China's Huawei has built a 400 MW/1.3 GWh solar-plus-storage off-grid facility in Red Sea New City, Saudi Arabia.

Covering 100 km of grid infrastructure, it is the world's first independent microgrid project to be fully powered by solar and energy storage without connection to any power network.

Here's something cool for neighborhoods - they're working on energy sharing systems. Instead of just using solar power for your own home, you'll be able to share it within your community. Extra power from ...

HUAWEI FusionSolar advocates green power generation and reduces carbon emissions. It provides smart PV solutions for residential, commercial, industrial, utility scale, energy storage systems, and microgrids. It ...

Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize sustainable energy solutions in hospitality.

Huawei has developed the world's largest microgrid power station which delivers 1 billion kWh power supply per year. The new solution will play a significant role in Saudi Arabia's Red Sea project and ...
