---

According to reports, the Chinese tech giant has submitted a patent application for a solid-state battery that could provide almost 3,000 kilometres, or 1,864 miles, on a single charge. This ...

In an effort to improve its energy storage, Huawei has submitted a patent application for a battery with a 3,000-kilometre range and a five-minute charging time. Compared to traditional lithium ...

Huawei has filed a patent detailing a sulfide-based solid-state battery design with energy densities between 180 and 225 Wh/lb, roughly two to three times higher than today's typical...

Huawei has filed a patent for a solid-state battery with extremely a high energy density and charging speeds. The announced range of up to 3,000 kilometers (1,864 miles) with only five...

Huawei is set to make a significant advancement in energy storage with its latest development in solid-state battery technology. The tech giant has recently unveiled a patent for a...

Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW,...

Huawei files a new patent for doped sulfide solid-state battery technology, promising enhanced safety, performance, and longevity for EVs and energy storage.

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast ...

Huawei has advanced its efforts in energy storage by patenting a sulfide-based solid-state battery. This innovation aims to provide a driving range of up to 3,000 km with ultrafast ...

# Huawei solid-state energy storage new energy

In fact, Chinese firm Huawei recently patented a solid-state battery design in China that could rock the world. According to a report from SynergyFiles , the company"s new design features...
