Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How to install solar panels on a tile roof?

The rails carrying the solar panels will also be attached to the tile roof hooks. You might say that your own roof has no wooden strips. Generally speaking, there must be a relatively sturdy material on the top beam of the roof. This material acts as a skeleton to support the roof tiles.

How do I install a solar panel?

Install the Solar Panel: Slot or fix the solar panel onto the installed mounting bracket. 3. Install the Microinverter and Anti-Backflow Device: Secure the microinverter to the bracket or wall. If an anti-backflow device is required, clip the anti-backflow meter onto the standard rail of the AC distribution box.
