How much does a 10kW Solar System cost in India?

The 10kW solar system price in India ranges between INR 4.5 lakhs and INR 7 lakhs. This price range includes the solar panels, inverter, and other components required to set up the system, but it does not include the cost of batteries for off-grid systems.

How does a 10kW Solar System work in India?

In India, if you have an on-grid 10kW solar system, you may qualify for net metering. This allows you to sell the excess electricity generated by your system back to the grid, earning credits that can be used to offset future electricity bills. Switching to solar power reduces your carbon footprint and contributes to a cleaner environment.

Is a 5kW Solar System a good choice in India?

A 5kW solar system is one of the most preferred choices for medium to large homes in India, especially where monthly electricity bills range from INR 3,500 to INR 6,500. It supports heavy appliances, provides strong daily power output, and offers excellent long-term savings.

How much does a hybrid solar system cost in India?

Hybrid solar systems combine the features of both on-grid and off-grid systems. They are connected to the grid and have batteries for storing excess energy. The 10kW hybrid solar system price in India ranges from INR 6.5 lakhs to INR 8 lakhs. Hybrid systems are more expensive due to the inclusion of solar panels and batteries.
