How to install a solar power system?

When you install your Solar Power system, try to position your photovoltaic panels directly under the noontime sun for maximum efficiency from your photovoltaic unit. Before Installation, take care of any obstructions to sunlight. Remove all unnecessary obstructions and items such as branches that may block sunlight to your solar unit.

Where should a solar panel be installed?

It is very important to install your solar panel at location that gets the most direct sun exposure. Solar Panels perform at optimum capacity when placed in direct sunlight. When you install your Solar Power system, try to position your photovoltaic panels directly under the noontime sun for maximum efficiency from your photovoltaic unit.

How do I connect a PWM controller to a solar panel?

Always connect the PWM to the batteries first, and then connect the solar afterwards. Your kit has come with one MC4 cable, this is to be cut to size for the cable from the panels to the controller and the remainder for cable from the controller to the batteries.

Can a solar panel be installed on a roof top?

Solar panels can be used to generate electricity for both commercial and home use. In both cases, the Photovoltaic Panel are installed on Roof Top to get maximum possible sunlight and generate maximum electricity from the system. Following are the steps involved in the installation process:
