Should I add solar panels to my existing system?

If you add solar panels to an existing system, you can increase your solar electricity generation, extend the life of your installation, and create further savings on utility energy costs.

Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system.

Why add solar panels to an existing solar system?

Can I add more solar panels to my home?

Most of the time, you can add more solar panels to your home. The economics will probably look a lot different than the first time you went solar. (And if you live in a state like California that upended its solar incentives, you're probably better off leaving your old setup alone.)

Are solar panels worth it?

If your home's average electricity consumption increased after you went solar, you may not be able to offset as much of your energy bill as in previous years. Today, the cost of adding extra solar panels may be worth it for increased solar savings after:

By investing in expert advice, property owners can confidently explore if they can add solar panels to an existing system, enhancing their energy installations, energy independence, and ...

Adding between five and ten panels is usually enough to cover increased electricity usage, but it ultimately depends on how your usage has changed. Do not add more solar panels to your system if ...
