Do JinkoSolar PV modules rust?

JinkoSolar standard PV modules have passed the IEC 61701:2020 salt spray corrosion test(method 6). In the case modules are installed within 50m to 500m from the seashore,the connectors shall be protected,i.e.,adding dust plugs. After removing the dust plugs,connect the connectors immediately and take other anti-rust measures to prevent rust.

Does Jinko Solar provide mounting components?

All installation methods herein are only for reference,and Jinko solar will not provide related mounting components,the system installer or trained professional personnel must be responsible for the PV system's design,installation,and mechanical load calculation and security of the system. Visually check the module for any damage.

What is JinkoSolar photovoltaic (PV) installation manual?

Thanks for choosing JinKoSolar photovoltaic (PV) modules (hereafter referred to as "modules"). This manual provides important safety guidelines for the installation, maintenance, and use of the modules. To ensure correct installation and stable power output, it is necessary to read and understand all installation instructions before proceeding.

How do I install a Jinko Solar module?

Modules can usually be mounted by using the following methods: fixed installation-mounting with bolts, fixed installation-mounting with clamps and tracker installation. *Notes: - All installation methods herein are only for reference, and they are based on the test results from third-party tests and JinKoSolar internal tests.
