Are solar panels a scam?

Solar panel scams target homeowners interested in installing solar energy systems. They involve scammers making false promises or tricking you into paying for services you'll never receive. Recently, the FTC also issued an alert to warn consumers about solar power scams, such as free solar panels or exaggerated savings.

What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.

How do I report a solar panel scam?

If you suspect you've fallen victim to a solar panel scam, report it to the Federal Trade Commission (FTC) and your state's consumer protection agency. You should also file a complaint with the Better Business Bureau (BBB) and inform your family and friends.

How do I protect myself from solar scams?

Protecting yourself from solar scams means taking a proactive approach and following a few key strategies. One of the most effective ways to protect yourself from solar scams is to know the average cost of solar panels in your area. By researching prices, you can identify quotes that are suspiciously high or low.
