Can China and Laos collaborate on a solar power project?

In what is the first large-scale solar photovoltaic project in Laos, CGN will collaborate with more than 70 Chinese and Laotian enterprises to establish a benchmark for electricity cooperation under the Lancang-Mekong Cooperation framework. The clean energy base is a vital power source supporting China-Laos power interconnection.

How will China-Laos energy transition work?

The clean energy produced will be transmitted to Yunnan province in China via the China-Laos 500kV grid, supporting Yunnan's energy transition and power supply security. Laos is currently at a critical stage of its energy transition.

How will China-Laos cooperation impact the Oudomxay project?

The project in Oudomxay province exemplifies the success of China-Laos cooperation. Beyond energy production, the project will drive improvements in local infrastructure, including roads, education, water supply and community facilities, while creating stable employment opportunities.

How does CGN contribute to Laos' economic development?

In addition to contributing to Laos' economic development, CGN is committed to sharing the benefits with local communities. CGN has implemented initiatives such as vocational training, educational support, community building, medical assistance, and agricultural aid to address urgent local needs and improve living standards.

Construction has commenced on the first phase of the one-million-kilowatt photovoltaic project at China General Nuclear Power Corporation (CGN)'s clean energy base in northern Laos. In ...

The first phase of the 1-million kilowatt photovoltaic project at China General Nuclear Power Group (CGN) clean energy base in northern Laos officially commenced on Wednesday, local ...

In what is the first large-scale solar photovoltaic project in Laos, CGN will collaborate with more than 70 Chinese and Laotian enterprises to establish a benchmark for electricity cooperation under the ...

Lao PDR faces seasonal power supply problems due to its heavy reliance on hydropower. Thus, the aim of this

Lao Hu Solar Power Generation

paper was to prioritize renewable energy (RE) resources for sustainable ...

The State-owned Electric Power Corporation of Laos, better known as Electricite du Laos (EDL), announced a comprehensive plan to strengthen the country's electricity supply from the ...

The PV power generation project that began construction yesterday was the first phase of the clean energy complex. CGN and the Lao government signed another deal in August for the ...

In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects. Electricite du Laos (EDL), ...

With a maximum potential of 18 GW of hydropower, Laos aims to provide the nation and the region with sustainable and clean energy. This research aims to investigate the possibilities of ...

The MOU covers cooperation between EDL and Huawei Laos on broad topics in the fields of solar power, including the solar power on-grid standard, solar inverter standard, joint market research for ...

In this regard, the Ministry of Energy and Mines, Lao PDR, requested the Economic Research Institute for ASEAN and East Asia to conduct this assessment and evaluate the ...
