In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects.

Laos signs an agreement to build a 100 MW solar power plant in Oudomxay, strengthening energy exports and reducing reliance on hydropower.

But here's the kicker: traditional power grids weren't built for solar's midday surges or wind's unpredictable gusts. Enter Vientiane's groundbreaking solution - a 50MW solar farm paired with ...

With 80% of its electricity already coming from renewables (mostly hydropower), Laos is now betting big on energy storage solutions to juice up its regional influence. But how did this ...

Laos has seen a 35% annual growth in solar energy adoption since 2020, driven by its tropical climate and government incentives. However, the intermittent nature of solar power demands reliable lithium ...

Laos power supply 2025 strategy accelerates Nam Ngum 3 hydropower and 12 solar projects as Electricit&#233; du Laos upgrades transmission, reforms tariffs, and expands capacity to meet ...

VIENTIANE, LAOS (June 16, 2016) - Sunlabob Renewable Energy Ltd., the venture-backed company specializing in renewable energy and clean water solutions, recently completed the construction and ...

It is the first large-scale solar project in Laos developed by a Chinese company. The initial phase of the project has a capacity of 50.1 MW, along with a 10 MWh energy storage system.

The Government of Laos and Electricit&#233; De France - EDF have signed an agreement to develop a 250MWp floating solar project in the central Laos province of Khammouane.
