What is the global solar PV panels market size?

The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287.13 billion by 2030, growing at a compound annual growth rate (CAGR) of 7.7% from 2024 to 2030.

What is the market share of solar PV panels in 2023?

Based on application, the industrial segment accounted for a dominant share of over 40.0% in solar PV panels sector in 2023. Companies in the commercial and industrial sectors are among the major consumers of solar photovoltaic panels owing to the large-scale demand for green energy.

How has global solar PV manufacturing capacity changed over the last decade?

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity - ten times more than Europe - and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011.

What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.

Solar PV Panel Market, Segmentation Based On Technology. ...

Solar panel installations in the UK hit 1.73 million in 2025, a 6.8% rise from the previous year. Renewables now provide 37% of the UK's electricity, surpassing fossil fuels for the first time. ...

In 2024, at least 34 countries installed more than 1 GW, up from 29 countries in 2023. 25 countries have more than 10 GW of total cumulative capacity and seven have more than 40 GW. ...

The solar PV panels market size reached at USD 184.29 billion in 2024 and is predicted to surpass around USD 384.44 billion by 2034 with a notable CAGR of 7.62%.

Large quantities of photovoltaic panels sold

Global solar installations reached nearly 600 GW - an impressive 33% increase over the previous year - setting yet another record. Solar accounted for 81% of all new renewable energy ...

Asia Pacific held the largest market share of over 54.0% in 2023. Based on technology, the thin-film segment occupied a dominant market share of over 42.81% in 2023. In terms of grid type, the on-grid ...

However, the expansion of the global solar photovoltaic market faces persistent hurdles. Issues such as low workforce availability, grid integration limitations, and continued support for the fossil fuel sector ...

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global ...

Solar PV Panel Market, Segmentation Based On Technology. Depending upon the technology, the market is segmented into crystalline silicon, thin film, and others. The crystalline ...

Discover all statistics and data on Global solar PV supply chain now on statista !

China holds over 35% of worldwide solar market share. The solar energy market is rapidly expanding, transitioning from an alternative energy source to a mainstream power generation ...
