What is the Malawi Bess project?

The Malawi BESS project will guide the scale-up of BESS projects in the Consortium's participating countries. To alleviate energy poverty by 2030 and save a gigaton of CO2 in low and middle-income countries, it is estimated that 90 GW of BESS must be developed to support the required 400 GW of renewable energy.

How can Malawi achieve a cleaner energy future?

The project will also contribute to a cleaner energy future for Malawi, reducing reliance on costly diesel generators, cutting carbon emissions by ~10,000 tonnes annually, and unlocking the full uptake of at least 100 MW of variable renewable energy, such as solar and wind power, into the grid.

How can collaboration improve the resilience of Malawi's grid?

By enhancing the stability and resilience of Malawi's grid, it demonstrates the power of collaboration in advancing energy access, reducing emissions, and supporting livelihoods.

Is Malawi a proof point for geapp's Bess project?

By breaking ground for this BESS project (and its subsequent completion expected in 2025), Malawi is an important proof point for the BESS Consortium launched by GEAPP at COP28 to secure 5 gigawatts (GW) of BESS commitments in low and middle income countries (LMICs) by the end of 2024.

Emerging markets in Africa and Latin America are adopting industrial storage solutions for peak shaving and backup power, with typical payback periods of 2-4 years.

President Lazarus Chakwera has today officially launched the Battery Energy Storage System (BESS) project by the Electricity Supply Corporation of Malawi (Escom) at Kanengo in Lilongwe.

GEAPP's first battery energy storage system (BESS) project in Africa, a 20 MW BESS in Malawi's capital city, Lilongwe.

BESS gives nations like Malawi the opportunity to include the least expensive renewable energy sources, such as wind and solar power, and battery energy storage is the key to maintaining ...

Lilongwe backup power communication bess power station

Malawi has taken a significant step towards transforming its energy access and reducing carbon emissions with the launch of a \$20 million Battery Energy Storage System (BESS) project in...

Malawi's 20 megawatt Battery Energy Storage System (BESS) was launched in Lilongwe by the President of Malawi, His Excellency Dr Lazarus Chakwera. It is the first of its kind in Africa and was ...

President Lazarus Chakwera on Monday rolled out the \$20 million (about K35 billion) Battery Energy Storage System (Bess) at Kanengo in Lilongwe, capable of st...

President Lazarus Chakwera on Monday rolled out the \$20 million (about K35 billion) Battery Energy Storage System (Bess) at Kanengo in Lilongwe, capable of storing 20 megawatts ...

Lilongwe, Malawi | 25th November 2024 - The Global Energy Alliance for People and Planet (GEAPP) and the Government of Malawi have officially launched the construction of a 20 MW battery energy ...
