How much do solar panels cost in Massachusetts?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Massachusetts homeowner needs a 10.62 kW solar panel system to cover their electricity needs, which comes out to \$33,132 before incentives.

Are solar panels a good idea in Massachusetts?

In fact, getting solar panels is one of the easiest ways to cut your electric bills and save thousands over time in Massachusetts. Here's what you need to know about going solar in the Bay State.

Do solar systems work in Massachusetts?

Many people have the misconception that solar (PV) systems do not work in Massachusetts, due to New England's diverse weather conditions. However, the experts agree that Massachusetts is an excellent location for solar systems. This section describes the different types of solar energy and how they are used in Massachusetts.

Can I install a solar system on my home in Massachusetts?

The only catch is that your system has to be installed on your primary residence. Massachusetts introduced its Solar Massachusetts Renewable Target (SMART) program in 2018 to compensate solar owners for the electricity their systems generate after the state's Solar Renewable Energy Certificate (SREC) program reached capacity.
