Top 10 countries with the most solar power installed 2024-25 list: China tops the global list, followed by the US, and India.

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find ...

In the Arabian Peninsula and North Africa, Saudi Arabia stood first with 6.155 kWh/m²/day of GHI, followed by Sudan (6.100), Egypt (6.065), ...

The top five countries are China, United States, India, Japan, and Germany, based on solar power generation and installed capacity. Emerging ...

OverviewEuropeGlobal use figuresAfricaAsiaNorth AmericaOceaniaSouth AmericaEuropean deployment of photovoltaics has increased considerably since the year 2010. Cumulative solar PV capacity in the European Union reached over 300 GW in 2024, with industry projections anticipating total capacity more than doubling by 2030, which would take solar power's share in EU electricity generation (9.2% in 2023) over 20%. Outside of the EU, similar growth in solar power is taking place in the United Kingdo...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the ...

China has made remarkable achievements in the development of new energy sources, ranking first in the world in the installed power generation capacity. Statistics show ...

This ranking tracks the share of electricity generated from renewable sources (hydro, wind, solar, bioenergy and other renewables) as a percentage ...

My country ranks first in solar power generation

Germany used 4.6% of global solar energy in 2022, making it the fifth biggest national consumer overall. The nation is also the European leader for ...

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.
