---

This workshop features five experts sharing microgrid use cases from various applications. Each presenter will focus on a specific microgrid project and cover the planning process used, any ...

For example, NRG Energy, one of the country's largest independent power producers, has turned its Princeton, New Jersey, headquarters into a fully-islandable microgrid demonstration ...

The system is installed in a microgrid test bed at NLR's Energy Systems Integration Facility with load banks that emulate microgrid critical loads and a programmable AC power supply ...

By 2035, microgrids are envisioned to be essential building blocks of the future electricity delivery system to support resilience, decarbonization, and affordability.

Since 2018, the NCU research team has gradually built up an on-campus microgrid demonstration area to conduct advanced research into power dispatching, energy sharing, and ...

Implement and operate your microgrid to produce and consume local energy. Monetize the value of your DER, optimize your bill, and avoid interruptions.

Pilot demonstration of advanced technologies for Microgrid using distributed energy resources is key to meet the clean energy goals around the world. Diverse scale implementation ...

This pilot demonstration project was hosted by EPRI to demonstrate how the SPIDER testbed can be used to validate microgrid controls and to showcase New Sun Road's AI-based controls.

In August 2013, the Energy Department announced partnering with the State of New Jersey, NJ Transit, and the New Jersey Board of Public Utilities to assess NJ Transit's energy needs and help develop a ...
