Which country imports the most solar panels in the world?

Pakistan has joined the ranks of the world's leading solar markets, importing 17 gigawatts of solar panels last year alone, according to the Global Electricity Review 2025 by Ember, an energy think tank in the UK. This surge represents a doubling of the previous year's imports, and makes Pakistan one of the top global buyers of solar panels.

Why is Pakistan a top buyer of solar panels?

This surge represents a doubling of the previous year's imports, and makes Pakistan one of the top global buyers of solar panels. The scale of Pakistan's imports is particularly striking because it is not driven by a national programme or utility-scale rollout.

Did Pakistan import more solar panels in 2024?

And yet, by the end of 2024, Pakistan imported more solar panels than almost any other nation in the world. The South Asian country, facing economic challenges and high energy poverty, is witnessing one of the most unexpected clean energy success stories of the decade.

Does Pakistan have a solar power grid?

Despite importing record volumes of solar panels, Pakistan's official grid-connected solar capacity remains far lower, indicating that much of the new solar is operating off-grid or behind the meter, where it escapes inclusion in national electricity statistics.
