Application: frequency regulation, voltage support, renewable energy integration, peak load shifting, microgrid and backup power supply. Charging/discharging rate: 1C, 0.5C, etc.

It can deliver a battery voltage of 768V, a grid - connected output of 320kW, and enables multi - power coordination among PV, grid, and diesel power sources. Equipped with IP54 protection ...

Designed specifically for large - scale industrial and commercial microgrids. It can deliver a battery voltage of 768V, a grid - connected output of 320kW, and enables multi - power coordination among PV, grid, and ...

Multiple cabinets can be directly connected in parallel to expand the capacity of the energy storage system and allow plug-and-play.

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other components can be ...

Compatible with solar PV, diesel generators, and grid power, it provides stable energy for microgrids, remote areas, manufacturing facilities, farms, and EV charging stations.

This outdoor cabinet for energy storage system (ESS) applications is engineered to house batteries, inverters, and controllers with superior protection and durability.

50kW/100kWh outdoor cabinet ESS solution (KAC50DP-BC100DE) is designed for small to medium size of C& I energy storage and microgrid applications. Individual pricing for large scale projects and wholesale demands ...

Paris Microgrid Outdoor Cabinet Grid-connected Type

100kW/215kWh LFP energy storage system, and a generator set. The hybrid energy storage system adopts integrated design, the battery and the MPS series hybrid inverter, which contains PCS modules and MPPT ...
