How much does it cost to reposition an intermodal shipping container?

The intermodal shipping container is 70 years old. Over the years it has been refined but ownership costs have increased. For example, this year, the annual operating prices have ranged between \$25,000 to \$40,000 to reposition an empty container.

Can collapsible shipping containers be used throughout the supply chain?

According to Nicholas from CEC systems, collapsible shipping containers can be used throughout the entire supply chain. We discuss the logistics issues throughout the supply chain that will be solved through reliable collapsible containers. Imbalanced supply chains result in the need to re-position empty shipping containers around the world.

Can a foldable container save CO₂?

With a foldable container that saves up to 37% in costs and CO₂. We are calling all shippers and shipping lines to take responsibility and start saving CO₂ with 4FOLD now. Without action the shipping industry will account for 10% of the global CO₂ emissions in 2050. This is much higher than the CO₂ target under the Paris agreement.

What logistics issues will be solved through reliable collapsible containers?

Reliable collapsible containers will help solve logistics issues throughout the supply chain, specifically the imbalanced supply of empty shipping containers around the world. We discuss this further in our discussion on the CEC System's collapsible shipping container design.
