-----

SolAirtech®; SA2200 is a low cost, high performance, self cleaning frontsheet film to replace glass in thin film, flexible PV modules. Our film allows your modules to offer high efficiency, lightweight capabilities ...

Polyester films can be used in a variety of constructions that are either mounted on the back of photovoltaic solar modules (crystalline) or used as a part of the construction for coated flexible ...

NOWOFLON ET Solar Energy is NOWOFOL's unique ETFE film for surface protection of photovoltaic modules, as well as a convection barrier for solar collectors.

Whether it's for use with standard, fast or ultra-fast cure encapsulants and laminating processes, Flexcon MultiGuard®; multi-layer backsheet products offer long-life UV and moisture protection and ...

PV laminates, Solar Films and PV Backsheet solutions for the photovoltaic industry.

Coveme develops and manufactures multilayer and monolayer polymer laminates for the protection of solar panels. These laminates, marketed under the company's dyMat®; brand, provide electrical ...

PF Film with High Light Transmittance: Over 88% transmittance in 400-1100nm wavelength range. Withstands >1000 kWh/m<sup>2</sup>; UV exposure.

PowerFilm's flagship thin-film material is based on Amorphous Silicon (a-Si) PV technology. This technology is highly flexible, durable, lightweight, and has excellent indoor and low-light performance.

The future of solar energy is here with our revolutionary film solar panels. These lightweight, flexible panels offer a versatile and efficient solution for a wide range of applications.

It's designed to replace glass in flexible thin film solar panels, delivering high light transmission, superb

# Photovoltaic soft film board

moisture barrier performance and excellent weatherability.
