Who are solar steel & imports?

Solar Steel and Supports are the two companies in the group dedicated to designing and supplying ad hoc photovoltaic solutions for each type of project.

Who are solar trackers & fixed structures?

We design and supply solar trackers and fixed structures for the solar photovoltaic sector with global design, manufacturing and supply capabilities. Product design is based on industry best practices, with a strong R&D component, seeking cost-optimized and efficient customized solutions.

Why should you choose a metal structure for solar panels?

As solar panels are becoming more and more popular around the world, more and more businesses are looking to take advantage of them. The metal structures offered by us are ideal for photovoltaic panels (solar panels), and because they are made of light steel profiles designed and manufactured with high precision, the assembly becomes easy and fast.

What are solar panels made of?

All the profiles used in our solar panel structure systems are made of S350-GD galvanized structural steel (from Zn 450 up to ZnMg 310 gr/m²), corrosion resistant, have a very low weight and have a high strength. Because of this, the structure will last much longer than the solar panels mounted on it.

We design and build steel structures to support ground-mounted photovoltaic installations on agricultural land of all sizes. Contact us!

Steel-X delivers robust, high-performance photovoltaic structures engineered to fit your exact project requirements--and we do it on time, every time. Complete the form and a dedicated ...

Each product ensures photovoltaic installations' stability, efficiency, and longevity, from robust structural support from brackets to the foundational strength of piles and structural steel ...

RuiFengDa (9SteelStruct) is a leading Chinese manufacturer of solar mounting structures, BIPV solutions, and cold-formed steel profiles. We provide high-quality, customizable solar brackets for ...

Photovoltaic support steel structure manufacturer

We design and manufacture a full range of solar mounting systems, supporting utility-scale, commercial, and customized photovoltaic projects. Our real production facilities, equipment, and processes ...

Buy directly from the manufacturer on the best terms and optimize your PV installations with our high-quality structures. Find out how we can support your solar project with innovative and customized ...

Taizhou Suneast New Energy Technology Co., Ltd is a high-tech enterprise specializing in solar photovoltaic bracket design, production, installation and related consulting services.

At Xingya Steel, we specialize in manufacturing high-quality, corrosion-resistant solar mounting systems that meet international standards. Our expertise in steel fabrication, engineering precision, and cost ...

We design and supply solar trackers and fixed structures for the solar photovoltaic sector with global design, manufacturing and supply capabilities. Product design is based on industry best ...

The metal structures offered by us are ideal for photovoltaic panels (solar panels), and because they are made of light steel profiles designed and manufactured with high precision, the ...
