Here's a head-scratcher for you: During Arizona's 2025 monsoon trials, a wind cannon array actually reduced destructive wind speeds downstream by 40%. It's like having your cake and eating it too - ...

Airborne wind energy (AWE) is the direct use or generation of wind energy by the use of aerodynamic or aerostatic lift devices. AWE technology is able to harvest high altitude winds, in contrast to wind ...

The airship, known as the "power station in the sky", uses a helium-filled balloon to lift a lightweight generator and harness wind energy at high altitudes. The electricity generated is then ...

The Windy Point/Windy Flats project, located in Goldendale, Washington, is the largest wind farm in Washington State. The 90 square miles (230 km²) wind farm spans 26 miles (42 km) along the ...

Chinese firm unveils world's largest dual-turbine floating wind platform, which can harness power during extreme typhoon conditions as well.

Well, you know wind energy isn't exactly new - humans have harnessed wind power since 7th-century Persian windmills. But modern wind turbine generators operate with space-age ...

The operator proudly claims it uses "wind power," and suddenly you're wondering - why aren't these things generating electricity? Let's cut through the confusion surrounding pneumatic wind cannons ...

At its core, a wind cannon driven generator operates on compressed air energy storage (CAES) principles. Imagine capturing a hurricane-force gust in an underground chamber, then ...

Did you know about WWII's strangest weapon? Discover the incredible story of the Wind Cannon!
#HistoryFacts #WWII #UnusualWeapons #MilitaryHistory

It was a type of gun that would eject a jet of compressed air against enemy aircraft. It consisted of a large

Power-generating wind cannon

angled barrel like a bent arm resting in an immense cradle. The cannon worked by the ignition ...
