How much does a 10kW Solar System cost in Australia?

The price of a 10kW solar system depends on the quality of components used, who you buy the system from, and whether you add battery storage. Most Australian households expect to pay around \$7,500-\$9,000 for a turnkey 10kW system with quality panels and a 25-year performance warranty. Premium inverters or higher-end panels can push prices higher.

How much does a 10kW off-grid solar system cost in Australia?

These points provide a comprehensive overview of the costs associated with installing a 10kW off-grid solar system in Australia, highlighting the importance of considering location, system specifications, and battery storage in the overall cost. The price for 10kW off-grid solar systems typically falls between \$25,000 and \$35,000.

How long does a 10kW Solar System last in Australia?

The payback period for a 10kW solar system in Australia is typically 4-5 years. This depends on your self-consumption rate and solar feed-in tariff. A solar system can pay for itself faster if you consume more of the energy on-site (daytime usage), rather than exporting excess to the grid.

How much does a solar system cost in Australia?

Solar Choice publishes a monthly Solar PV Price Index that tracks average pricing trends in every capital city in Australia. According to Solar Choice's own data, the average 10kW solar system price in Australia as of July 2025 is about \$0.91 per watt- or about \$9,130 after the federal STC rebate is deducted.
