The RB20 is a lithium iron phosphate (LiFePO₄) battery with more power, less weight and lasts much longer than its lead-acid counterparts. It's longer life span provides exceptional lifetime value.

All RELiON Batteries use the safest and most stable components, including a LiFePO₄ cathode and a built-in Battery Management System (BMS). The BMS ensures a long lifetime, safe handling - and ...

The RB20 is a lithium iron phosphate (LiFePO₄) battery with more power, less ...

RELiON lithium iron phosphate batteries can last up to 6000 cycles at 80 percent depth of discharge, without a decrease in performance. The average lifetime of lead-acid batteries is just 500-1000 ...

LiFePO₄ batteries are characterized by their exceptional stability, long cycle life, and enhanced safety features. They maintain a consistent voltage output throughout their discharge cycle and can ...

LiFePO₄ batteries are lighter, take less space and last longer. While the up-front cost is higher than Gel, AGM or Lead-Acid the overall cost of ownership is lower over time because they require no ...

Maintenance crews appreciate the 10-year lifespan, which reduces replacement frequency compared to AGM's 2-3 year typical service life in daily marine use. "Relion's LiFePO₄ ...

All RELiON Batteries use the safest and most stable components, including a LiFePO₄ cathode and a built-in Battery Management System (BMS). The BMS ensures a long lifetime, safe handling - and ...

What is the lifespan of a LiFePO₄ Battery? Battery life is measured in life cycles and RELiON's LiFePO₄ is typically rated to deliver 3500 cycles at 100% depth of discharge (DOD). Actual life expectancy is ...

RELiON lithium batteries provide up to 10 times longer life than lead-acid batteries, and they still provide 80% of the rated capacity after 3,500 cycles. RELiON lithium batteries are maintenance-free - no ...

Relion lifepo4 lifetime

To ensure your RELiON Lithium Iron Phosphate (LiFePO₄) battery provide its maximum life, follow these Charging Instructions. When charging LiFePO₄ make sure that you are not using a charger meant ...
