Our [H2] Innovation Experience is North America's first-ever clean renewable hydrogen powered microgrid and home. This project demonstrates how net-zero gas made from renewable ...

The Community Microgrid Initiative is designed to achieve Community Microgrid demonstration projects that prove that local renewables connected to the distribution grid can provide at least 25% of the ...

The project will demonstrate the resiliency and reliability of a renewable hydrogen microgrid that can power neighborhoods - just in time to kick off National Clean Energy Week.

Seven EPIC-funded microgrid projects funded in 2015 recently concluded their three-year implementation timelines. These seven projects demonstrated low-carbon-based microgrids for ...

This report features 26 microgrid case studies from California, North America, and other countries that make innovative business cases and rely on government support for less than 50 percent of project ...

Recent microgrid demonstration projects in Scotland, Germany, South Africa and southern California aim to prove the potential of green hydrogen microgrids to reliably power homes, ...

The report builds on experience and lessons from the U.S. Department of Energy's (DOE) National Renewable Energy Laboratory (NREL) in supporting the Miramar microgrid project ...

This project provides direct technical assistance to municipalities, utilities, and community stakeholders to develop nationally-impactful microgrid demonstrations.

The work began in 2008 as a project to install a high-efficiency, 100% renewable energy-powered, single-building microgrid. Since then, the project has expanded into an installation-wide ...
