A sweeping domestic policy bill passed by House Republicans could spell disaster for the U.S. rooftop solar industry, potentially halving installations next year and triggering widespread bankruptcies, ...

Provisions in the GOP policy bill would end a host of tax credits for renewable energy, including one that allows homeowners to recoup 30 percent of the cost of a rooftop solar system....

"I would not say that we're expecting a collapse in the residential solar industry," said Zöe Gaston, principal analyst at Wood Mackenzie, a data analytics firm. "We are expecting a contraction."

Moe and her wife, Jackie DeCarlo, had been waiting to install solar panels for years, but things kept getting in the way -- their roof was too old, and then they had to wait to have it...

Turns out solar companies were right. The CPUC revamped California's rooftop solar regulations, reducing payments to homeowners for excess battery stored power. After the fact. After all new homes built ...

Three environmental groups argued Wednesday before the California Supreme Court that state utility regulators acted illegally when they voted in late 2022 to slash incentives for rooftop solar...

Though solar represented just 3.4% of the nation's electricity generation in 2022, studies show that rooftop solar could eventually meet residential electricity demand in many states if...

Over the past two decades, more than 5 million U.S. households from California to Georgia to Maine have put solar panels on their roofs, drawing energy from the sun and reducing their electric...

U.S. residential solar companies are preparing for a steep drop in business this year after the expiration of a federal tax credit that helped drive more than a decade of rapid growth, prompting...

Rooftop solar panels were stopped

In Florida, intake forms for 10,000 low- and middle-income households to enrol for federal subsidies to get solar units installed on their rooftops were ready when the \$156m project was...
