---

The Singapore Wireless Communication Base Station industry boasts a dynamic and well-regulated environment, serving as a strategic hub for regional operations across Southeast Asia.

Due to the proximity of Singapore to Malaysia and Indonesia, almost all radios and television sets in Singapore can pick up broadcast signals from both countries.

OverviewBackgroundTelephonesTelevisionInternetExternal linksAfter reform initiatives, the Singaporean telecommunication industry became streamlined and largely directed by the government, which viewed such policy as critical in shaping societal preferences and in directing the state's economy. Being able to provide adequate telecommunications services is also critical when approached from the perspective that Singapore's legitimacy as a state rests on its capability to deliver a high standard of living to its citizens. Hence, beginning in the 1970s, the state pu...

MPA said five Maritime 5G base stations have been installed and operationalised as of 2024. Up to seven more base stations will be operationalised by 2025 to complete Maritime 5G ...
